

Company Introduction / Overview

Company Introduction

Shimmer is a technology company that is the leading provider of wearable wireless sensing technology in the world – their products and solutions are trusted and utilised by the world's brightest start-ups, Fortune 500 companies, and leading Universities, shipping to over 60 countries worldwide. Established in 2008, the company designs, develops, manufactures and market a full range of wearable wireless sensing technology and solutions to provide high quality, scientifically reliable biophysical and movement data in real-time. This unlocks the potential for analysis and interpretation of sensed data specific to the person, their application, and their environment. Headquartered in Dublin, Ireland and with a world class R&D centre in Boston, Shimmer offers wearable wireless sensing technology, solutions and consultancy services to the Research and Education, Enterprise, and End User markets that overcomes the challenges of size, wearability, reliable communications and low power consumption.

50 Word Introduction

Shimmer is the leading provider of wearable wireless sensing technology and solutions. Enabling rapid development of applications, products and services, Shimmer offers complete control over the quality of data capture, interpretation and presentation for each unique use case. Used in over 60 countries, Shimmer overcomes the challenges of size, wearability, reliable communications and low power consumption.

25 Word Introduction

Used in over 60 countries, Shimmer offers proven, modular and scalable wearable wireless sensing technology and solutions tailored to fit the application, the use, and the individual.
