

Shimmer3 200g IMU

Wireless Sensor Platform

Shimmer3 IMU & 200g board

INTRODUCTION

Shimmer3 200g is an embedded add-on board to the standard Shimmer3 IMU sensor. The Shimmer3 200g unit has the capability to measure high g force up to 200g, making it adaptable for applications measuring high g force.

PRODUCT OVERVIEW

The Shimmer3 200g unit retains all the features of the Shimmer3 IMU unit and is fully compatible with our Consensys hardware and software platform. This results in a powerful and elegant wearable wireless sensor which will provide superior data quality, adding value to your data collection process.

Shimmer3 200g offers best data quality with integrated 9DoF inertial sensing via accelerometer, gyroscope, magnetometer and altimeter, each with selectable range. Shimmer3 200g also boasts an integrated motion processor for on-board 3D orientation estimation. 5 coloured LEDs indicate device status and operating mode, as well as indicating Bluetooth streaming functionality.

KEY FEATURES

- Very low power consumption, light weight, and small form factor
- Slide-switch for powering on/off
- Readily connects via Bluetooth or local storage via an 8GB microSD card (supports up to 32GB)
- SD data bypass
- 24MHz MSP430 CPU
- Best data quality - Integrated 9DoF inertial sensing via accelerometer, gyroscope, magnetometer, and altimeter, each with selectable range
- Two accelerometers give choice between ultra-low noise or wide range measurements
- Integrated motion processor for on-board 3D orientation estimation
- 5 coloured LEDs across 2 locations to indicate device status and operating mode
- Integrated Li-ion battery management
- JTAG debugging mode available
- Expansion header for alternative radio
